

Context and Research Process

Context

- Media Informatics Chair
- German University (2026)
- Growing GenAI adoption
- Inconsistent course rules

Challenge

- Uncertainty about acceptable AI use
- Unclear disclosure expectations
- Need for shared guidance

Approach

- Human-centered design
- User-centered governance
- Students first → Staff second

Participatory Process

Student Focus Groups

Participants

- 12 B.A. Media Informatics Students
- 2 Focus Groups (7 + 5)
- 90 min each Focus Group

Data Collection

- Brainstorming Cards
- Facilitator Notes
- Written Comments

Discussion Topics

- Current GenAI Use
- Allowed vs. Problematic Uses
- Existing Rule Awareness
- Need for Guidance

Output

- AI Use Cases
- Concerns & Questions
- Areas of Uncertainty

Staff Workshop

Participants

- 12 Teaching Staff
- Professor to Junior Staff
- 2-hour Workshop

Output

- Consensus Areas
- Disagreement Areas
- Governance Requirements

1. Evaluate Use Cases

- Student-derived AI Scenarios
- Acceptable ↔ Unacceptable Scale
- Written Annotations

2. Reflect on Practice

- Encouraged AI Use
- Documentation & Disclosure
- Problematic Cases
- Areas of Uncertainty

3. Governance Discussion

- Rule Conflicts
- Existing Prohibitions
- Need for Common Guidance
- Plenary Discussion

AI Guidance

Shared Principles

- Transparency
- Responsibility
- Competence Development

Course-Specific Guidance

- Use Cases
- Conditions
- Learning Objective

AI Disclosure

- Tools
- Areas of Use
- Work steps
